Education

Software Security Master

2019 - 2021

Università di Genova

Genoa – Italy

110/110 with honors

Computer Science Bachelor

2015 - 2018

Università di Genova

Genoa – Italy

110/110 with honors

Technical School Diploma

2010 - 2015

Italo Calvino High School

Genoa – Italy

66/100

Current situation

Sep. 2023 **Leonardo S.P.A.**, Genoa

Backend Software Developer

Backend developer for a module of a **Cyber Range platform** used for cybersecurity training and simulation.

Responsible for the design and development of backend components in **Python**, contributing to the implementation of platform features and the integration of services supporting cyber-defence exercises and realistic attack simulations.

Experience

Sep. 2021 – Sep. 2023 **Leonardo S.P.A.**, Genoa

Software Security Architect

I use to study and implement security mechanisms for **critical infrastructures**.

Currently, I'm working on the data protection systems of a customer. In particular, I've been involved in the **analysis of its security requirements and in the solutions integration**. These includes centralized **anti-malware systems**, **two factor authentication**, **HSM** as well as make all the **network traffic encrypted**.

Sep. 2018 – Sep. 2021. **Horsa Devlab**, Genoa

Full-Stack Web Developer

Assigned to develop management applications both **Front-end** and **Back-end**.

The software I was working on deals with the management of orders, stocks, products, tests and specifications of a pharmaceutical industry. The application uses **Angular** for client-side interface management and **.NET Core** for server-side API management using the ASP.NET MVC pattern. The system relies on a **SQL Server** database.

From this experience I've learned how World Wide Web really works in depth and I've improved a lot my programming skills.
